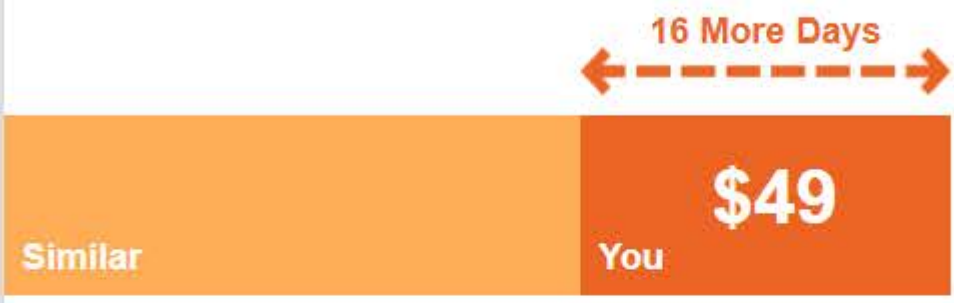
HydroOttawa

This is not a bill

Energy Info for Your Street

Last year, you started heating your home 16 days before similar homes in Ottawa. This cost you $49 more than others.



*This is for the electric portion of your heating only. For customers with non-electric central heating, this represents the electrical components of the furnace.

Here are some tips to stay warm this fall:

Open curtains and blinds

On cold, but sunny days, open your curtains and blinds to bring in the sun's heat.

Improve insulation and weatherstripping

Install insulation and weatherstripping to save significantly on your heating costs this winter.
