

Hydro Ottawa Limited EB-2015-0004 Interrogatory Responses IR:H-7-1(Carriers #1)ORG ORIGINAL Page 1 of 7

1		Response to Carriers Interrogatory Question #1
2		
3	Refere	ence: Exhibit H, Tab 7, Schedule 1, page 5, section 3.3
4		
5	Hydro	Ottawa states "As of yearend 2013, Hydro Ottawa had seven companies
6	attachi	ing to Hydro Ottawa poles. Telecom cables and street lighting represented the
7	majori	ty of attachments; however, Bell Canada and Hydro One ("HONI") also had
8	attach	ments. With the exception of HONI, which applies its own OEB-approved rate, the
9	remair	ning companies pay the current, province-wide annual pole charge of \$22.35 per
10	pole."	
11		
12	Exhib	it H, Tab 7, Schedule 1, Attachment H-7(a) (referred to herein as "Attachment H-
13	7(a)") v	which identifies 35,663 poles with attachments.
14		
15	<u>Quest</u>	ion #1:
16		
17	a)	Confirm that the 35,663 poles with attachments are all Poles with Wireline
18		Attachments. If not, how many Poles do not have Wireline Attachments?
19	b)	In indicate the year used to determine the 35,663 poles with attachments and
20		whether this is based on the number of poles with attachments at year end or the
21		average for the year.
22	C)	Provide a list of the Wireline Attachers that currently have Wireline Attachments
23		on one or more Poles and indicate in each case whether or not the Wireline
24		Attacher pays Hydro Ottawa's OEB-approved pole attachment rate of \$22.35 for
25		all of its Wireline Attachments and, if not, indicate what compensation is paid by
26		the Wireline Attacher, if anything.
27	d)	Provide a list of the Wireless Attachers that currently have Wireless Attachments
28		on one or more Poles and indicate in each case whether or not the Wireless
29		Attacher pays Hydro Ottawa's OEB-approved pole attachment rate of \$22.35 for
30		all of its Wireless Attachments and, if not, indicate what compensation is paid by
31		the Wireless Attacher, if anything.

Poles with no Wireline

Poles with 2 Wireline

Poles with 1 Wireline Attacher

Attachers

Hydro Ottawa Limited EB-2015-0004 Interrogatory Responses IR:H-7-1(Carriers #1)ORG ORIGINAL Page 2 of 7

- e) Provide a list of the Other Attachers that currently have Other Attachments on one or more Poles, indicating for each Other Attacher the types of Other Attachments it has on Poles and whether or not the Other Attacher pays Hydro Ottawa's OEB-approved Pole attachment rate of \$22.35 for all of its Other Attachments. If the Other Attacher does not pay the OEB-approved rate of \$22.35 for all of its Other Attachments, state what compensation it does pay, if anything.

5 i) Provide the source of the data provided in response to (f). (g) and (h), indicating whether the data are based on a census of all Hydro Ottawa poles or on a sample or some other methodology and the date of any such census, sample or other methodology. If a sample was used, provide details regarding the nature and scope of the sampling undertaken. If some methodology other than a sample

Hydro Ottawa Limited EB-2015-0004 Interrogatory Responses IR:H-7-1(Carriers #1)ORG ORIGINAL Page 4 of 7

1		or census was used, provide a detailed description of the methodology and all
2		data sources and inputs.
3	j)	Describe in detail the methodology and data inputs, including data sources, used
4		to determine that Hydro Ottawa has 35,663 Poles with attachments.
5	k)	Describe in detail the type of attachments HONI has installed on poles owned by
6		Hydro Ottawa (i.e., their purpose of the service they provide). How many Poles
7		have HIONI attachments? Where on the pole are HONI's attachments installed?
8	I)	Provide the rate that is paid by HONI for its attachments to Hydro Ottawa Poles.
9	m)	Define what is meant by "telecom cables" and whether or not this term
10		encompasses attachments by Bell Canada.
11	n)	Has Hydro Ottawa installed any of its own attachments or equipment within the
12		communications space of its Poles? If so, how many Poles have such
13		attachments and describe the type of attachments and their purpose or service
14		provided.
15	o)	Provide the number of Poles with street lighting attachments and the name(s) of
16		all owners of such street lighting attachments.
17

Hydro Ottawa Limited EB-2015-0004 Interrogatory Responses IR:H-7-1(Carriers #1)ORG ORIGINAL Page 5 of 7

1	а.	HOL had 35,663 in-service power distribution poles with 3rd party attachers
2		including wireline attachments.
3	b.	This total was determined at EOY 2013.
4	C.	The following list of Wireline Attachers currently have Wireline Attachments on
5		one or more Poles and pays Hydro Ottawa's OEB-approved pole attachment rate
6		of \$22.35 for all of its Wireline Attachments:
7		1. Allstream – telecom attachments
8		2. BH Telecom – telecom attachments
9		3. Canadian P2P Fibre Systems - telecom attachments
10		4. Eastlink - telecom attachments
11		5. Rogers – telecom attachments
12		6. Telus – telecom attachments
13		7. Videotron – telecom attachments
14		8. Bell Canada - telecom attachments
15		9. Village of Casselman – street lighting attachments
16		10. City of Ottawa - street lighting attachments attachments
17		
18		The following Wireline Attacher currently has Wireline Attachments on one or
19		more Poles and does not Hydro Ottawa's OEB-approved pole attachment rate of
20		\$22.35 for its Wireline Attachments:
21		1. HONI – electrical distribution
22		
23	d.	Rogers is the only 3rd party wireless attacher.
24		
25	e.	Since 2002, HOL has had third party telecom antennas (i.e. wireless attachment)
26		on its poles and currently charges the OEB-approved wireline attachment rate.
27		Since the 3rd party telecom attacher has existing wire attachments on the
28		specific HOL poles with antennas, the attacher does not pay additional
29		attachment rates for its antennas as per the OEB Decision RP-2003-0249. Over

Hydro Ottawa Limited EB-2015-0004 Interrogatory Responses IR:H-7-1(Carriers #1)ORG ORIGINAL Page 6 of 7

1		the last several years, 3rd party telecom antennas on provincially regulated
2		power poles have attracted discussion with the OEB and across Canada.
3		
4		HOL has an immaterial number (three-dozen poles) of community based 3rd
5		party decorative banner attachers that install for temporary festive periods lasting
6		only several weeks during a year. These 3rd party banner attachers are required
7		to provide insurance and meet technical standards, but do not pay for their
8		attachment other than any make-ready work done by HOL.
9		
10	f.	HOL's GIS system is used to track 3rd party attachments. This GIS system is a
11		dynamic database system such that data queries are made on the current data
12		since there are no historical fields. Historical tracking functionality can be added
13		to the GIS system, but, will increase the cost to the pole attachment rate to
14		recover those GIS modification costs.
15		
16	g.	Please see Interrogatory Response to Carriers Question #1, part f.
17		
18	h.	Please see Interrogatory Response to Carriers Question #1, part f.
19		
20	i.	HOL completed a field survey of its poles in 2003-2004 with the participation of
21		its major 3rd party attachers. At the conclusion of this field survey, the relevant
22		survey data was provided to its major 3rd party attachers. This field survey data
23		was imported to HOL's GIS system. Since this last field survey, HOL has used
24		the approved 3rd party attacher permits to update its GIS system.
25		
26	j.	HOL runs standard queries on its GIS data for 3rd party attachments on its poles.
27		
28	K.	HONI has distribution power attachments on HOL poles. The majority of these
29		602 poles (EOY 2014) are along service boundary roads between HONI and
30		HUL.
31		

1 I. HONI applies for OEB-approved attachment rates for its agreement with local 2 distribution company ("LDC") pole attachments. These HONI OEB approved 3 rates can be found on the OEB website. 4 5 m. "Telecom cables" are cables used for telecommunication purposes. With respect to telecom cables on HOL power poles. Bell Canada wireline attachments are 6 7 considered telecom cables. 8 9 n. Since HOL has electrical protection communication equipment attached to 10 twenty-four of its poles, this small quantity of HOL attachments is immaterial to the total number of 3rd party attachments. 11 12 13 o. 13,265 of HOL poles have street light attachments that have an OEB Attachment 14 Rate. Both the City of Ottawa and the Village of Casselman pay for their street 15 light attachments on HOL poles.

Hydro Ottawa Limited EB-2015-0004 Interrogatory Responses IR:H-7-1(Carriers #2)ORG ORIGINAL Page 1 of 2

1		Response to Carriers Interrogatory Question #2
2		
3	Refere	ence: Exhibit H, Tab 7, Schedule 1; Exhibit H, Tab 7, Schedule 1, Attachment
4	H-7(a)	
5		
6	<u>Quest</u>	ion #02:
7		
8	a)	Does Hydro Ottawa currently have a joint use agreement with Bell Canada
9		whereby Hydro Ottawa and Bell Canada have reciprocal access to one another's
10		poles? If yes, please provide a copy of the agreement.
11	b)	Does Bell Canada pay Hydro Ottawa the OEB-approved Pole attachment rate of
12		22.35 for its Wireline Attachments? If the answer is no, what compensation or
13		other consideration does Bell Canada provide to Hydro Ottawa?
14	c)	Does Hydro Ottawa provide any services to Bell Canada for work done on Poles
15		owned by Bell Canada, for example, for maintenance related to vegetation, storm
16		or emergency repairs? If yes, provide the amounts received by Hydro Ottawa for
17		any such work and indicate whether the amounts received fully recover Hydro
18		Ottawa's expenditures for the work.
19	d)	Does Bell Canada provide any services to Hydro Ottawa for work done on Poles
20		owned by Hydro Ottawa, for example, for maintenance related to vegetation,
21		storm or emergency repairs? If yes, provide the amounts received by Bell
22		Canada for any such work.
23	e)	Does Hydro Ottawa have any joint use agreements with any third party other
24		than Bell Canada (for example, HONI) that provide for reciprocal access to one
25		another's poles? If yes, provide the information identified in (a) and (d) for all
26		such agreements.
27	f)	Is Hydro Ottawa aware of any plans by any entity which would significantly
28		increase the number of Wireline Attachments or Other Attachments on the Poles
29		such as, for example, the recently announced plan by Bell Canada to roll out new
30		fibre facilities on 80,000 poles in Toronto? If so, please describe the plan and
31		how many Poles may be potentially affected.

1		
2	_	
3		
4	<u>R</u>	esponse:
5		
6	a.	Currently, HOL has a reciprocal pole attachment agreement with Bell Canada.
7		Release of this agreement requires Bell Canada's consent.
8		
9	b.	Yes, Bell Canada pays Hydro Ottawa the OEB-approved Pole attachment rate of
10		\$22.35 for its Wireline Attachments.
11	C.	The relevance of this question to HOL's proposed pole attachment rate is not clear.
12	d.	The relevance of this question to HOL's proposed pole attachment rate is not clear.
13	e.	HOL has a reciprocal pole attachment agreement with Hydro One. Please see
14		Interrogatory Response to Carriers # 1 (I).
15		
16	f.	Currently, HOL is not aware of any 3rd party attacher plans which would significantly
17		increase the number of wireline attachments.
18

1		Response to Carriers Interrogatory Question #4
2		
3	<u>Refer</u>	ence: Attachment H-7(a) which states that Hydro Ottawa has applied an
4	alloca	tion factor of 25.9% based on two third party attachers.
5		
6	<u>Ques</u>	<u>tion #04:</u>
7		
8	a)	Provide a detailed description of the basis for using 2 third party attachers,
9		including all data inputs and the sources of all such data inputs.
10	b)	Complete the table below indicating the dimensions (in feet) for the space on a
11 12		Pole used by Hydro Ottawa to generate an allocation factor of 25.9%.
		Buried Portion
		Clearance Space
		Communications Space
		Separation Space
		Power Space
		Total length of Pole
13		
14	c)	Indicate whether or not street lights are located in the separation space and, if
15		not, identify the space(s) on a Pole where street lights are located.
16	d)	Indicate whether power facilities, such as transformers, ever encroach on, or are
17		attached in, the separation space on the Poles.
18	e)	Provide all steps in the calculation and all data inputs used to determine an
19		allocation factor of 25.9%.
20		
21		
22		
23		
24		
25		

Hydro Ottawa Limited EB-2015-0004 Interrogatory Responses IR:H-7-1(Carriers #4)ORG ORIGINAL Page 2 of 4

1 Response:

2 3

4

5

a. HOL allows up to a maximum of three telecom support strand attachments, per pole, except for some restricted areas. HOL submits that the actual number attachments on its poles are less than 2.5 as per its end-of-year 2013 data:

 $\frac{\text{Total OEB Rate Attachments on Hydro Ottawa poles}}{\text{Hydro Ottawa Poles with OEB Rate Attachments}} = \frac{43,082 + 13,265}{35,633}$ $= \frac{56,347}{35,633} = 1.58 \text{ Attacher per pole}$

6 For rate calculation purposes, HOL will use a value of 2.0 third party Attachers, 7 per pole that provides future attacher opportunities. This value of 2.0 third party 8 attachers, per pole may be considered optimistic considering the merger and 9 acquisitions by telecom companies and other types of attachers, but is more 10 representative than 2.5 attachers, per pole. Trending the telecom attachment 11 count rate, HOL had 1.36 telecom attachments per pole in 2004, whereas, at the 12 end of 2013, this value dropped to 1.21 telecom attachments, per pole(43,082/ 13 35,633 = 1.21).

14

21

b. The allocation factor determines the percentage of indirect costs attributed to
HOL and to the 3rd party attachers based on the usage of the pole. To calculate
the allocation factor, a typical 40-foot (') distribution pole (h=40') is divided into
five vertical spaces, as explained below and as shown in the figure that follows
the explanation. Each defined space is then allocated to HOL and/or the 3rd
party Attachers based on the proportionate usage space on the pole.

- i. Buried depth (b=6') this space provides foundational support for the
 pole (typically 10% of the pole height + 2' for average soil conditions)
 and is allocated equally between all parties.
- 25 ii. Clearance Space (c=17.25') this space is the height above grade to
 26 the lowest wires/fixtures and is allocated equally between all parties.
 27 iii. Telecommunication Space (t=2') this space is only used by the 3rd
- 27III.Telecommunication Space (t=2) this space is only used by the 3rd28party attachers and is allocated solely to the 3rd party Attachers.

1		iv. Separation Space (s=3.25') - this space is required to maintain a
2		minimum clearance from the lowest electrical distribution wires to the
3		highest telecommunication attachments as per CSA C22.3 No. 1
4		standard. This space is solely allocated to the 3rd party attachers
5		because the separation space is required to accommodate their
6		attachments on the pole and provide a safe working space for the
7		telecom worker. Note that 3rd party street light attachments normally
8		attach to the pole in this space due to their above roadway height
9		requirements for proper illumination.
10		v. Power Space (p=11. 5') - this space is allocated solely to HOL, as
11		telecoms attachers are not able to attach their equipment in this
12		space.
13		
14		The allocation space is calculated by dividing each defined space by the
15		total number of users of that space. Where the space is jointly allocated
16		between HOL and the 3rd party attachers, HOL is considered to be one
17		user, based on the average number of users, per pole. Therefore, in total,
18		the allocation factor assumes an average of 3 users per pole. This
19		allocation model yields a space allocation factor of:
20		
21		n = the average number or 3rd party attachers on a HOL pole = 2.0
22		e = number of electrical companies in the power space on a HOL pole =
23		1.0
24		
25		Individual 3rd party attacher space allocation factor
26		$= \frac{1}{h} * \left[\frac{s}{n} + \frac{t}{n} + \frac{c}{(n+e)} + \frac{b}{(n+e)}\right] = \frac{1}{40} * \left[\frac{3.25}{2} + \frac{2}{2} + \frac{17.25}{(2+1)} + \frac{6}{(2+1)}\right] = 25.9\%$
27		
28	C.	Please see Interrogatory response to Carriers #4, part b.
29		
30	d.	HOL has limited legacy installations where it allowed third party attachers to
31		install their wireline attachments in the separation space. This practice was done

Hydro Ottawa Limited EB-2015-0004 Interrogatory Responses IR:H-7-1(Carriers #4)ORG ORIGINAL Page 4 of 4

to assist the 3rd party attacher in avoiding the associated make-ready costs of
changing the pole to be taller and provide CSA standard (C22.3 Part7) vertical
clearances. In such legacy circumstances, this effectively reduced the separation
space. This practice was stopped in 2001. The current HOL practice for its poles
without sufficient height to maintain the CSA standard separation space, is to
change the pole.

- e. Please see Interrogatory response to Carriers #4, part b.
- 9

1	<u>Respo</u>	onse to Carriers Interrogatory Question #6
2		
3	Refere	ence: Attachment H-7(a) which identifies a net embedded cost per pole of
4	\$1,678	3.00.
5		
6	<u>Quest</u>	<u>ion # 6:</u>
7		
8	a)	For each of the years 2010-2015 (actuals for 2010-2014 and estimates for 2015),
9		provide Hydro Ottawa's average embedded cost per pole. Identify the categories,
0		descriptions and values of all asset accounts (both aggregate and sub-accounts)
1		used to determine the average embedded cost and the total number of poles
2		used to determine a per pole cost, if applicable.
3	b)	For each of the years 2010-2015 (actuals for 2010-2014 and estimates for 2015),
4		provide Hydro Ottawa's net embedded cost per pole. Identify the categories,
5		descriptions and values of all asset accounts (both aggregate and sub-accounts)
6		used to determine the net embedded cost, as well as the total number of poles
17		used to determine a per pole cost, if applicable.
8	c)	Describe in detail the methodology, including applicable cost inputs, that was
9		used to determine the net embedded cost per pole of \$1,678.00. Describe the
20		manner in which the costs of power-specific or power-only assets were excluded
21		from the calculation. Include all supporting evidence, assumptions and
22		calculations employed.
23	d)	Confirm that all of Hydro Ottawa's costs to replace poles for whatever reason are
24		included in the average and net embedded cost of a pole.
25		
26		
27		
28	<u>Respo</u>	onse:
29		
30	a. Hy	dro Ottawa's average net embedded cost, per pole, for the years 2011 to 2014
31	an	d estimated for 2015 are provided in Table 1, below. Hydro Ottawa does not use

5

6 b. Please refer to response a).

c. Hydro Ottawa followed OEB methodology in determining indirect cost inputs. For
direct costs, see response to Allstream question #1 (a) and (b). The average net
embedded cost per pole of \$1,678 was calculated by dividing the average net book
value of Poles, towers and fixtures, as per Hydro Ottawa's 2013 financial records for
external reporting purposes, by the total number of in-service poles. Average net
book value of the pole assets is calculated by subtracting the accumulated
depreciation from the cost of the pole asset. For year-end 2013, these values were:

- 16 i. Cost = \$147.1M 17 ii. Accumulated depreciation = \$ 66.6M 18 iii. Net book value = \$ 80.5M 19 iv. # of In-service HOL poles 47,978 = 20 Average net book value per pole \$ 80.5M / 47,978 ν. = 21 \$ 1,678 * =
- *See Table 1 if the above calculation were based on the MIFRS information
 included in Exhibit B-2-1, Appendix 2-BA

24

15

Hydro Ottawa Limited EB-2015-0004 Interrogatory Responses IR:H-7-1(Carriers #6)ORG ORIGINAL Page 3 of 3

1 Power-specific or power-only assets were excluded in the calculation of the pole 2 attachment rate by way of an attacher space allocation factor. Hydro Ottawa 3 calculated the allocation factor based on a typical 40-foot distribution pole, which 4 is divided into five vertical spaces and each defined space is then allocated to 5 Hydro Ottawa and/or the 3rd party attachers. Where the space is jointly-6 allocated between Hydro Ottawa and the 3rd party attachers, Hydro Ottawa is 7 considered to be one user, based on the average number of users, per pole. The 8 model yielded individual third party attacher space allocation factor of 25.9 9 percent.

10

11 d. Confirmed.

1		Response to Carriers Interrogatory Question #10
2		
3	Refe	rence: Attachment H-7(a) which identifies a capital carrying cost per pole of
4	\$112	43.
5		
6	Ques	tion #10:
7		
8	a	Confirm whether or not the capital carrying cost of \$112.43 per pole is based on
9		a weighted average cost of capital of 6.70%. If not, identify the weighted average
10		cost of capital that was used. Explain in detail why 6.70% or some other weighted
11		average cost of capital has been used.
12	b	Provide the capital structure and cost of capital in the same format provided in
13		Appendix 2, Tab OA Capital Structure, used for the calculation of the capital
14		carrying costs per pole of \$112.43.
15		
16		
17		
18	<u>Resp</u>	onse:
19		
20	а.	This cost was calculated by applying the most recent OEB approved weighted
21		average cost of capital (WACC) rate of 6.7% to the net embedded cost per pole.
22		Net Embedded Cost Per Pole * WACC = \$1,678 * 6.7% = \$112.43
23		
24	b.	Please refer to Exhibit E-1-1, Appendix 2-OA.

5		
6	<u>Quest</u>	ion #11:
7		
8	a)	Provide a detailed description of all activities undertaken as part of "pole
9		maintenance", including the tasks performed, the employee categories involved,
10		the hourly wages, vehicle costs and time required to complete each task.
11	b)	Provide a detailed description of the methodology, assumptions and all data
12		inputs (and data sources), including the number of poles, used to generate a
13		"pole maintenance" expense of \$12.61 per pole.
14	C)	Indicate whether the costs of "pole maintenance" that are attributable to power-
15		only assets were excluded from the calculation leading to the figure \$12.61. If
16		yes, explain and demonstrate how these costs were excluded. Indicate whether
17		the costs of maintaining Single Use Poles were excluded from the same
18		calculation. If yes, explain and demonstrate how these costs were so excluded.
19		In both cases, provide the methodology, assumptions and calculations used.
20	d)	Indicate whether tree trimming costs are included in the pole maintenance
21		expense. If yes, confirm that Wireline Attachers are required to perform their own
22		or pay separately for tree trimming in respect of their attachments and provide all
23		amounts paid to Hydro Ottawa by third parties for tree trimming for each year
24		from 2010 to 2015.
25	e)	For each year from to 2010 to 2015, provide all amounts paid to Hydro Ottawa by
26		third parties for any activities included in pole maintenance expense (excluding
27		tree trimming) for each year from 2010 to 2015.
28	f)	Complete the table below with respect to the costs associated with the
29		maintenance expenses for each of the years 2010 to 2015, using actuals for
30		2010-2014 and estimates for 2015. Provide the sources and supporting data for
31		the values used to populate the table.

1

Hydro Ottawa Limited EB-2015-0004 Interrogatory Responses IR:H-7-1(Carriers #11)ORG ORIGINAL Page 2 of 3

	2010	2011	2012	2013	2014	2015	
Total pole maintenance							
expenses							
Number of poles							
Total pole maintenance							
expenses per pole							
Response: a. The pole maintenance expense captures the cost of these activities (pole testing, repairs and straightening) undertaken by HOL for the purposes of maintaining the structural integrity of its distribution poles.							
b. To arrive at this cost, the	ne expend	litures incu	rred by H	OL were	divided by	the total	
number of poles to determine the cost per pole of executing its maintenance							
programs. The costs, p	er pole, o	of each pr	ogram we	ere added	to derive	the total	

12 programs. The costs, per pole, of each program were added to derive the tota 13 annual pole maintenance expense per pole. As of yearend 2013, these values were:

-			· · · · · · · · · · · · · · · · · · ·
14		i.	Total pole maintenance = \$605,081
15		ii.	In-service Hydro Ottawa poles = 47,978
16		iii.	Maintenance costs per pole = \$605,081 / 47,978
17			= \$12.61 / in-service Hydro Ottawa poles / year
18			
19	C.	Pole mai	ntenance costs are independent of having 3 rd party attachers.
20			
21	d.	Tree trin	nming costs were not included in the calculation of pole maintenance
22		expense.	
23			
24	e.	Make-rea	ady costs for HOL to accommodate 3rd party attachment requests on its
25		power po	ples are not part of maintenance costs. Between 2010 and 2015, 3rd party

Hydro Ottawa Limited EB-2015-0004 Interrogatory Responses IR:H-7-1(Carriers #11)ORG ORIGINAL Page 3 of 3

attachers did not pay any direct maintenance cost for their attachments other than
 the cost component built into the OEB pole attachment rate.

3

f. With reference to Table 1, the 2010 to 2014 pole maintenance expenses for 2010 to
2014 are based on the 2013 calculation methodology for proposed pricing.

6

7

Table 1: 2010 – 2015 Pole Maintenance Expenses

	2010	2011	2012	2013	2014	2015

17

18

22

5 a. The administrative costs represent the on-going operational costs of managing 6 and administrating third party attachment permits and occupancy on those HOL 7 poles that have 3rd party attachers. These costs capture the following operational 8 expenditures in HOL's current work for others labour rate, which in 2013 was \$95 9 labour rate. The three components that comprise these direct administrative 10 costs are:

1. Annual routine invoicing costs related to processing of the Attacher invoices:

- 16 hours/year x \$95/hour = \$1,520/year
- tracked by internal finance scheduling calendar

142. Annual routine updating of GIS permit tracking and reporting system with15third party attachments:

- 167 hours/year x \$95/hour = \$15,865/year
- 2013 tracked internally to establish baseline estimated annual commitment.
- Annual routine permit processing (both in office and field permit review) and
 O. Reg. 22/04 annual attachment installation audits for third party Attachers:
- \$123,906/year
 - Tracked by dedicated internal tracking work order

1 b. In HOL's Geographic Information System (GIS), each pole has a 3rd party 2 attachment field that lists if a specific 3rd party attacher is attached to that pole. 3 The data collection is as identified in Interrogatory Response to Carriers #1, part 4 i. 5 6 c. The direct administrative costs are in respect to only HOL poles with 3rd party 7 attachers. 8 9 d. Please see Interrogatory Response to OEB #21, part ii. 10 11 e. HOL's accounts receivable department takes the annual pole attachment 12 statistics from HOL's GIS group, develops the invoices for each 3rd party 13 attacher, has it verified and approved before sending the annual attachment 14 invoice out to each 3rd party attacher. 15 16 f. After each 3rd party attachment permit is approved, the permit is sent to HOL's 17 Geographic Information System (GIS) group for input into the GIS. Each pole 18 associated with the permit is updated with the permit data. 19 20 g. This function receives the initial 3rd party attachment permit, reviews it for 21 completeness and pole ownership in the HOL Geographic Information System 22 (GIS). Any missing or incomplete items are communicated back to the 3rd party 23 attacher for follow up action. Once the permit is complete at the initial intake 24 stage, it is sent for HOL initial field review for feasibility (height, strength, 25 available space, location, and other technical requirements) and to identify or 26 confirm any required make ready work. The permit is returned for further review 27 with the HOL asset and design groups for any existing project conflicts or any 28 known upcoming projects. Final HOL review of the technical requirements is also 29 completed before the permit is approved or denied by HOL. Any make ready 30 work requirement by HOL is forwarded to the associated HOL lines area

Hydro Ottawa Limited EB-2015-0004 Interrogatory Responses IR:H-7-1(Carriers #12)ORG ORIGINAL Page 4 of 5

manager. No installation can proceed before the make ready work by HOL is
 complete.

3 This HOL work group also conducts the required annual O. Reg. 22/04 post 4 construction audit. In 2004, the province introduced O. Reg. 22/04 to ensure 5 public safety with power distribution systems. This regulation extends to third 6 party attachers on power system structures. The provincial authority (Electrical 7 Safety Authority - ESA), for O. Reg. 22/04 developed a "Guideline for Third Party 8 Attachments" as well as requiring minimum field audits of installations as per 9 Section 8 of the regulation. ESA's Technical Guideline for Section 8 - Inspection 10 and Approval of Construction (Section 2.4.5.6) specifies that the distributor audit 11 the 3rd party attacher's field installations for assurance of construction 12 compliance during each annual audit period. A minimum of ten percent annual 13 sample rate of the completed third party attacher's permits is audited as per 14 HOL's Construction Verification Program (CVP) as approved by ESA. HOL 15 provides its 3rd party attachers with the results of this annual audit with any 16 required corrective actions to be completed and follows up with further O. Req. 17 22/04 audits if required during an audit period with the attachers. This mandated 18 regulatory routine construction compliance audit is beyond the originally 19 negotiated standard support structure agreement (with its audit period of five 20 years) and has been calculated into these direct administrative costs.

1 d) Hydro Ottawa uses a labour rate of \$95 per hour. Provide the comparable labour 2 rates for each of the years 2012 to 2015 inclusive. 3 e) Describe in detail the methodology, data sources and data inputs used to determine the "rate/amount" identified for "Small Vehicle Time" for each of the 4 5 four functions. 6 f) Explain the variations for "Small Vehicle Time" in the Rate/ Amount column. 7 8 9 10 **Response:** 11 12 a. Pole replacements 13 When Hydro Ottawa Limited replaces an old pole with a new pole that has 3rd 14 party attachments on it, the old pole cannot be removed until the 3rd party 15 attachments(s) are transferred to the new pole. As a result, Hydro Ottawa Limited 16 has a three step process in replacing its old poles, rather than a one-step 17 process, as a result of a delayed 3rd party transfer: 18 The Hydro Ottawa Limited crew installs the new pole and transfer its power 19 equipment from the old pole to the new pole. The old pole remains until the 20 3rd party attachers transfer off to the new pole. 21 • After the transfer notice has been issued to the 3rd party(s), Hydro Ottawa 22 Limited field verifies that the 3rd party(s) transfers are complete before 23 scheduling its line crew to remove the old pole. 24 The Hydro Ottawa Limited crew returns to remove the old pole. 25 If there are no attachers on Hydro Ottawa Limited's poles, no site returns are • 26 required since Hydro Ottawa Limtied crew removes its pole(s) at the same 27 time of its equipment transfer work. 28 29 Wires Down 30 Hydro Ottawa Limited routinely receives reports of wire down or low from external 31 sources. These reports are logged into Hydro Ottawa Limited's outage

Hydro Ottawa Limited EB-2015-0004 Interrogatory Responses IR:H-7-1(Carriers #13)ORG ORIGINAL Page 3 of 5

management system (OMS) and Hydro Ottawa Limited field staff is dispatched to
 field verify the report. If the wires are not owned by Hydro Ottawa Limited, Hydro
 Ottawa Limited reports back to the wire owner about the wires down.

4

5

6

7

8

9

Trees on Wires

Hydro Ottawa Limited routinely receives reports of trees in wires from external sources. These reports are logged into Hydro Ottawa Limited's outage management system (OMS) and Hydro Ottawa Limited field staff is dispatched to field verify the report. If the wires are not owned by Hydro Ottawa Limited, Hydro Ottawa Limited reports back to the wire owner about the trees in the wires.

10 11 12

b. Pole Replacement

- In 2013, Hydro Ottawa Limited changed out 1,087 poles of which 74.3% had 3rd
 party attachers. The annual incremental costs for the field verification, after
 transfer notice, for one site visit to confirm third party transfers are complete
 (although several field visits are the norm over several months with delayed
 transfers), were:
- 18 1 hour travel per site x (\$95/labour hour + \$5.80/car hour) x 1,087 poles x 74.3%
 19 of the poles had attachments = \$81,410/year
- 20 The annual incremental costs for the Hydro Ottawa Limited returning crew travel 21 time to remove the old poles were:
- 22 1 hour travel per site x (\$95/labour hour x 2 person crew + \$44.00/truck hour) x
- 23 1,087 poles x 74.3% of the poles had attachments = \$188,988/year
- 24The total old pole replacement annual incremental costs due to 3rd party25attachers = \$81,410 + \$188,988 = \$270,398/year
- Normally, 3rd party attachers are delayed from completing timely transfers
 causing incremental site visit costs with multiple site visits to Hydro Ottawa
 Limited. These delayed transfers from the old poles have caused frustration with
 the public and the road authority within Ottawa.

Hydro Ottawa Limited EB-2015-0004 Interrogatory Responses IR:H-7-1(Carriers #13)ORG ORIGINAL Page 4 of 5

1		
2		Field Verification
3		Routine field verification of non- Hydro Ottawa Limited wires low/down, of which
4		there were 115 reported in 2013:
5		1 hour travel per site x (\$95/labour hour + \$33.00/truck hour) x 115 reports
6		= \$14,720/year
7		Routine field verification of non- Hydro Ottawa Limited tree-on-wires, of which
8		there were 251 reported in 2013:
9		1 hour travel per site x (\$95/labour hour + \$5.80/truck hour) x 251 reports, which
10		equals \$25,300/year
11		To date, Hydro Ottawa has not calculated the associated lost time with its staff
12		and contractors working around existing third party attachments on its existing in-
13		service poles or managing public inquiries or complaints about the removal of old
14		poles still having 3 rd party attachers.
15		
16	C.	Table 1 outlines the loss in productivity costs for the years 2010-2015, using
17		actuals for 2010-2014 and estimates for 2015.

1		Response to Carriers Interrogatory Question #14
2		
3	Refere	nce: Attachment H-7(a) which identifies costs for pole replacement
4		
5	<u>Quest</u>	ion #14:
6		
7	a)	Describe in detail the methodology, data sources, data inputs and year used to
8		determine that 808 poles with attachments were replaced. Provide the number of
9		poles with attachments that were replaced in each year from 2010-2015
10		(estimate for 2015).
11	b)	Where five or more adjacent poles were subject to "Field Verification" activity,
12		identify the locations of the poles and the number of poles for each location.
13	C)	Where five or more adjacent poles were subject to "Returning Crew" activity,
14		identify the locations of the poles and the number of poles for each location.
15	d)	Do the costs for pole replacement and the number of poles replaced include
16		poles for which Hydro Ottawa received payment to replace (e.g., customer
17		requested replacements or relocations, make ready work to accommodate
18		Wireline Attachers)? If so, provide the amount of revenues received and the
19		corresponding number of poles replaced for each of the years indicated in the
20		table above.
21	e)	Regarding the "Returning Crew", is the same crew employed for installing the
22		new pole, transferring the hydro attachments and removing the old pole?
23	f)	Provide a detailed description of the differences in crew, equipment, time and
24		number of visits required to complete pole replacements of Single Use Poles or
25		poles without Wireline Attachments as compared to poles with Wireline
26		Attachments.
27	g)	Confirm that it is Hydro Ottawa's practice to replace a group of poles within a
28		given area (e.g., on the same street or within the same neighbourhood) at the
29		same time rather than replacing each pole in that area individually at separate
30		times. Indicate how many of the 808 poles identified as being replaced were
31		replaced along with a group of contiguous poles in the same area.

Hydro Ottawa Limited EB-2015-0004 Interrogatory Responses IR:H-7-1(Carriers #14)ORG ORIGINAL Page 2 of 3

1		
2	_	
3		
4	<u>Re</u>	sponse:
5		
6	a.	In 2013, Hydro Ottawa Limited changed out 1,087 poles of which 74.3% (see
7		Interrogatory Response to Carriers #13 part b) had 3rd party attachers. The 1087
8		pole count comes from Hydro Ottawa Limited's Pole, Tower and Fixtures account.
9		
10	b.	Many poles are replaced as one-offs for several reasons:
11		1. planned replacement at end-of-asset life (60% of the poles replaced);
12		2. electrical system enhancements;
13		3. relocation request by others;
14		electrical connection/upgrade request;
15		5. pole upgrade request by a 3rd party pole attacher;
16		6. damaged by others.
17		
18		As per Interrogatory Response to Carriers #9, part b, Hydro Ottawa Limited
19		replaces end-of-asset life poles through its planned pole testing program.
20		Although Hydro Ottawa Limited groups poles into neighbourhoods for its annual
21		replacement program, the poles for replacement are normally not immediately
22		adjacent to each other but distributed throughout an area. To field verify poles
23		replaced through its planned replacement program, several hours are required to
24		drive through the planned replacement area (for both front lot and off road poles).
25		
26	C.	The duration for a Hydro Ottawa Limited returning crew of one hour per pole includes
27		travel time and setup/take-down time at the site. Although an estimate, one hour is
28		not much time for additional time required to get to a pole and complete its work.
29		With a very low estimate of one hour per pole, there would not be more efficiencies
30		with five or more area poles.

Hydro Ottawa Limited EB-2015-0004 Interrogatory Responses IR:H-7-1(Carriers #14)ORG ORIGINAL Page 3 of 3

d. Yes, the costs for pole replacement and the number of poles replaced include poles
 for which Hydro Ottawa Limited has received payment to replace.

The capital contribution received with pole replacements for years 2011-2014 are shown in Table 1, below. 2010 has not been provided as it is not comparable, due to the change in capitalization policies.

6

Table - 1: Capital Contribution and Number of Poles Affected

Year	2011	2012	2013	2014
# of Poles Affected	210	186	190	86
Capital Contribution (\$'000)	2,414	1,222	1,054	2,667

7

- 8 e. The Hydro Ottawa Limited returning crew is of the same skill set and equipment as
 9 the original pole installation and electrical attachment transfer.
- 10
- f. See Interrogatory Response to Carriers #14, part e, for crew/equipment
 composition. If there are no 3rd party attachers on Hydro Ottawa Limited poles, no
 site returns are required since Hydro Ottawa Limited crew removes its pole(s) at
 the same time of its equipment transfer work.

15

16 g. Please see Interrogatory Response to Carriers #14 part b and part c.

17

Hydro Ottawa Limited EB-2015-0004 Interrogatory Responses IR:H-7-1(Carriers #15)ORG ORIGINAL Page 1 of 2

1		Response to Carriers Interrogatory Question #15
2		
3	Refere	ence: Attachment H-7(a) which identifies costs for field verification
4		
5	<u>Quest</u>	ion #15:
6		
7	a)	Describe the nature of "Wires Down" and explain why they are associated with
8		pole attachment costs, including and an explanation whether "Wires Down" refers
9		to exclusively to telecommunications cable or any type of wires and how the
10		nature of the "Wires Down" was determined.
11	b)	Describe in detail the methodology, data sources, data inputs and year used to
12		determine the 115 reported "Wires Down" and 251 reported "Tree on Wires",
13		including if these wires were Wireline Attachments and, if so, how this was
14		determined. Provide the number of reported "Wires Down" and "Tree on Wires"
15		for each year from 2010-2015 (estimate for 2015).
16	c)	Where five or more adjacent poles were subject to "Wires Down" activity, identify
17		the locations of the poles and the number of poles for each location.
18	d)	Describe the nature of "Tree on Wires" and explain why they are associated with
19		pole attachment costs, including and an explanation whether "Tree on Wires"
20		refers to exclusively to trees on telecommunications cable or any type of wires
21		and how the nature of the "Tree on Wires" was determined.
22	e)	Where five or more adjacent poles were subject to "Tree on Wires" activity,
23		identify the locations of the poles and the number of poles for each location.
24		
25		
26		
27	<u>Respo</u>	onse:
28		
29	a. Fo	r non-Hydro Ottawa Limited wires low/down, these wires are 3rd party telecom
30	wir	es. Although streetlights are attachment to Hydro Ottawa Limited poles, these
31	str	eet light fixtures receive their power directly from Hydro Ottawa Limited secondary

Hydro Ottawa Limited EB-2015-0004 Interrogatory Responses IR:H-7-1(Carriers #15)ORG ORIGINAL Page 2 of 2

1		wires and do not have dedicated wires spanning aerially between Hydro Ottawa
2		Limited poles.
3		
4	b.	Please see Interrogatory Response to Carriers #13, part a and part c.
5		
6	C.	Reviewing the Hydro Ottawa Limited Outage Management System (OMS) logs, the
7		non-Hydro Ottawa Limited wires low/down were one-off pole spans except one storm
8		in the summer of 2012 where Bell was attached to seven Hydro Ottawa Limited
9		poles.
10		
11	d.	Please see Interrogatory Response to Carriers #15, part a.
12		
13	e.	Reviewing the Hydro Ottawa Limited OMS logs, the non-Hydro Ottawa Limited trees

14 in wires were one-off pole spans.

Response to Carriers Interrogatory Question #16

<u>Reference:</u> Exhibit H, Tab 7, Schedule 1; Exhibit H, Tab 7, Schedule 1, Attachment H-7(a)

6 **Question #16:**

7 8

9

1

2

3

4

5

a) Complete the table below with respect to revenues from pole attachments for each of the years 2011 to 2016.

	2011	2012	2013	2014	2015 (estima te)	2016 (estima te)
No. of Wireline Attachers						
No. of Wireline						
Attachments						
Pole Attachment Fee	\$22.35	\$22.35	\$22.35	\$22.35		
Revenues from Wireline						
Attachers						
No. of Wireline Attachers						
No. of Wireline						
Attachments						
Pole Attachment Fee						
Revenues from Wireline						
Attachers						
No. of Wireline Attachers						
No. of Wireline						
Attachments						
Pole Attachment Fee						
Revenues from Wireline						
Attachers						

10

11

12 13 b) Provide the underlying data inputs used to derive the estimated revenue from pole attachments for 2015; specifically, the number of Wireline and Other Attachers per Pole, the number of Poles with billable Wireline and Other

Hydro Ottawa Limited EB-2015-0004 Interrogatory Responses IR:H-7-1(Carriers #16)ORG ORIGINAL Page 2 of 2

Attachments and the total billable Wireline and Other Attachments. Include in the
 response supporting evidence and assumptions employed.
 4
 5

6 **<u>Response</u>**:

a. For previous years number of wireline attachments, please see Interrogatory
Response Carriers #1, part f. Hydro Ottawa Limited does not receive revenue from
wireless attachers (see rationale in Response to Carriers Interrogatory Question
#5(a)). Please see Interrogatory Response to Carriers #1, part d, for further details.
Similarly, Hydro Ottawa Limited does not receive revenue from other attachers.
Please see Interrogatory Response to Carriers #1, part e, for further details.

- 13
- 14 Table 1, below, summarizes the pole attachment revenues for the year 2011 to 2016.
- 15

 Table 1: Pole Attachment Revenues for the Years 2011 to 2016

	2011	2012	2013	2014	2015* actual	2016* estimate
No. of Wireline Attachers	8	8	8	7	8	8
No. of Wireline Attachments	52,741	54,723	55,082	50,269	50,420	51,029
Pole Attachment Fee (\$)	22.35	22.35	22.35	22.35	22.35	57.00
Revenues from Wireline Attachers (\$)	1,034,593	1,082,773	1,092,680	1,007,064	1,013,914	2,552,583

16 *Note, 2015 revenues are billed in January based on number of attachments at EOY 2014 + EOY 2015

17 True-up. Estimated revenues for 2016 attachments based on 2015 attachment numbers and attachment rate18 submitted.

19

20 b. Please see Interrogatory Response to Carriers #16, part a.

Hydro Ottawa Limited EB-2015-0004 Interrogatory Responses IR:H-7-1(Carriers #17)ORG ORIGINAL Page 1 of 3

1		Response to Carriers Interrogatory Question #17
2		
3 4 5	<u>Refere</u> H-7(a)	ence: Exhibit H, Tab 7, Schedule 1; Exhibit H, Tab 7, Schedule 1, Attachment
6		
7	<u>Quest</u>	ion #17:
8		
9	a)	Provide a detailed description of the process, including all steps involved, for a
10		Wireline Attacher to receive approval to install:
11		i. its first Wireline Attachment on a Pole; and
12		ii. each subsequent Wireline Attachment.
13	b)	Further to response (a), provide copies of all forms, permit applications or similar
14		documents that Hydro Ottawa requires Wireline Attachers to complete.
15	C)	Does Hydro Ottawa charge a Wireline Attacher a separate fee to review and
16		process applications, and issue permits, to install a Wireline Attachment on a
17		Pole?
18	d)	If the answer to (c) is "yes", (i) what is the current value of that fee for each permit
19		application and (ii) provide the total annual revenues received in respect of such
20		permit fees for each of the years 2010 through 2014, and estimated for 2015.
21	e)	Confirm that a request from a Wireline Attacher to install Wireline Attachments on
22		a Pole is subject to that Pole having sufficient space or structural integrity to
23		accommodate the Attachment (i.e., spare capacity). Is the determination of
24		whether there is spare capacity on a Pole made solely by Hydro Ottawa? If not,
25		please identify any other party that may participate in the determination of
26		whether there is spare capacity on a Pole.
27	f)	If no spare capacity is available for the Wireline Attachment, confirm that there is
28		a process by which Hydro Ottawa will modify or replace the Pole to
29		accommodate the Wireline Attachment, subject to the Wireline Attacher paying
30		for all costs associated with such work (i.e., make ready). Confirm that all such
31		costs are included in the average and Net Embedded Cost of a Pole identified by
32		Hydro Ottawa for purposes of its requested pole attachment rate.

Hydro Ottawa Limited EB-2015-0004 Interrogatory Responses IR:H-7-1(Carriers #17)ORG ORIGINAL Page 2 of 3

- g) Further to (f), provide the total annual revenues received from Wireline Attachers for make-ready work for each of the years 2010 through 2014, and estimated for 2015.
- h) If Hydro Ottawa has a template (or templates) of the support structure agreements it requires Wireline Attachers and Other Attachers to enter into, provide copies of all such templates.
- 7 8

6

9 **Response:**

- 101111121212131313141415151616171717
- 18
- b. The permit application process and forms are contained within the poleattachment agreement.
- 21

c. As per its model pole attachment agreement (see Interrogatory Response to
 Carriers # 17 part h, HOL does not charge a separate fee to wireline attachers for
 permit review and processing fee except where a 3rd party cancels more that
 15% of its submitted permits or when a 3rd party requires a rush review on their
 submitted permits.

27 28

d. Please see Interrogatory Response to Carriers #17, part c.

29 30

e. Please see Interrogatory Response to Carriers #12, part g.

Hydro Ottawa Limited EB-2015-0004 Interrogatory Responses IR:H-7-1(Carriers #17)ORG ORIGINAL Page 3 of 3

1

- 4
- -5

g. Table 1, below, provides the actual total revenues received from Wireline Attachers for make-ready work for each of the years 2010 through 2014 and estimated for 2015.

7

6

Table 1: Revenues from Wireline Attachers for Make-ready Work

	2010* \$	2011 \$	2012 \$	2013 \$	2014 \$	2015 \$ estimate
Revenue Received	-	1,691	28,281	11,333	5,514	6,754

8 9 *Note: there were no revenues received for Make Ready work in 2010.

h. HOL does not have an up-to-date template of its competitive carrier pole
 attachment agreement. HOL questions the relevance of providing the template
 agreement for determination in this rate proceeding. Please see Interrogatory
 Response to Carriers #2, part a, for the Bell Canada agreement. Please see
 Interrogatory Response to Carriers #2, part a, and part e for the HONI
 agreement.

Hydro Ottawa Limited EB-2015-0004 Interrogatory Responses IR:H-7-1(Carriers #18)ORG ORIGINAL Page 1 of 1

1		Response to Carriers Interrogatory Question #18
2		
3	<u>Re</u>	ference: Attachment H-7(a)
4		
5	<u>Qu</u>	estion #18:
6		
7		a) Confirm that "Total Cost per Pole with attachments per year" of \$56.26 is an
8		annual cost.
9		b) Explain why Hydro Ottawa is seeking an initial pole attachment rate of \$57.00
10		when the calculations require only a rate of \$56.26.
11		
12		
13		
14	<u>Re</u>	sponse:
15	a.	EOY 2013 calculated rate = \$56.26.
16		
17	b.	Hydro Ottawa Limited's annual rate escalation factor for OM&A = 2.1% per year for
18		its rate application. Escalating the 2013 EOY rate of \$56.26, increases this amount to
19		\$57.46. This amount was then rounded down to \$57.00 for 2016.
