

October 30, 2019
VIA RESS, EMAIL and COURIER

Ms. Kirsten Walli Board Secretary Ontario Energy Board P.O. Box 2319 2300 Yonge Street, Suite 2700 Toronto, ON M4P 1E4

Dear Ms. Walli:

Re: Electricity Distribution Licence No. ED-2002-0556
2020 Electricity Distribution Rate Application (EB-2019-0046)

Please find attached Hydro Ottawa's responses to Board Staff's interrogatory questions received October 18, 2019 and October 24, 2019.

Please do not hesitate to contact me if you require anything further.

Respectfully,

Original approved by Gregory Van Dusen

### Question #3:

3

Ref: Attachment 8-3-A 2020 RTSR Workform\_20190812

Ref: EB-2019-0164 Decision and Rate Order - 2019 Uniform Transmission Rates, July 25, 2019

7

5

6

The OEB updated the 2019 Uniform Transmission Rates (UTRs) on July 25, 2019.

9

11

12

- a) Please update the RTSR workform using the latest RTSR model, updated August 8, 2019, from the 2020 Electricity Distribution Rate Applications webpage.
- b) Please update the low voltage cost allocation calculation with the updated RTSR connection rates.

131415

### Follow Up - Question 3

(Update the RTSR Workform using the latest RTSR Model)

17

18

16

### Response:

19

20

21

a) The RTSR Workform has been updated to reflect the 2019 Uniform Transmission Rates which were updated in the RTSR model on August 8, 2019. This workform can be found in Attachment Att-OEB-Q3-1.

22

23

The updated RTSR Workform also includes updates discussed in response to OEB Staff Interrogatory 4.

2425

b) The Low Voltage Cost Allocation Calculation has been updated and can be found in Attachment Att-OEB-Q7-1 as part of the response to OEB Staff Interrogatory 7.

27

26

Hydro Ottawa Limited EB-2019-0046 Interrogatory Responses IR: OEB Staff #3 ORIGINAL October 30, 2019 Page 2 of 2

### Follow Up Response:

a) The RTSR Workform has been updated using the latest RTSR Model, which was updated on August 8, 2019 and accessed from the 2020 Electricity Distribution Rates Application page on the OEB's website. This workform can be found in Attachment Att-OEB-Q3-1(Follow-up).

### 2020 RTSR Workform for Electricity Distributors

The purpose of this sheet is to calculate the expected billing when current 2019 Uniform Transmission Rates are applied against historical 2018 transmission units.

### Question #10:

3

### Ref: Exhibit 9/Tab 1/Schedule 1/Page 4

567

From the approved accounting order for Account 1508 Other Regulatory Assets – Sub-account Y Factor Variance Account in EB-2015-0004, it states the existing facilities:

8

10

11

...shall be taken out of service in the same year as the new Administrative Building is put in service, unless any of the properties are sold prior to that time. The revenue requirement impact (depreciation, interest, return and PILs) shall be credited to the Y Factor Variance Account.

121314

15

The existing facilities remained in service in 2018. The new facilities were placed into service in May 2019. Hydro Ottawa is requesting recovery of the 2019 and 2020 revenue requirement for the new facilities.

161718

19

20

21

27

28

29

- a) Please explain whether Hydro Ottawa has recorded the revenue requirement impact from the removal of the existing facilities in the Y Factor Variance Account.
- b) If yes, please provide the calculation of the revenue requirement impact.
- c) If no, why not.
- d) In Attachment 3 of the approved settlement proposal from Hydro Ottawa's 2016 Custom IR rate application, Hydro Ottawa proposed one rate rider relating to the existing facilities, "netting the gain/loss and the amount removed from rate base". In the example provided, it also stated that if the buildings were sold in 2019, Hydro Ottawa would propose to "file a rate rider in 2019 to begin January 1, 2020". Please discuss the status of the sale of the buildings.
- e) If the buildings have been sold, please explain why Hydro Ottawa has not proposed a rate rider for the net gain/loss and revenue requirement impact from the removal of the existing facilities from rate base.

### Follow Up - Question 10 (part 1)

Hydro Ottawa indicated that subsequent to the submittal of the 2020 rate application, one of the existing facilities has been sold and the revenue requirement will be recorded in the Y Factor Account in October 2019. Another existing facility is scheduled to be sold in the third quarter of 2019. Please provide an updated calculation of the Y Factor

Hydro Ottawa Limited EB-2019-0046 Interrogatory Responses IR: OEB Staff #10 ORIGINALOctober 30, 2019 Page 2 of 6

- account balance, showing the calculation of the removal of revenue requirement for the
- two existing facilities. Please confirm that Hydro Ottawa is proposing to dispose the
- 3 updated Y Factor account balance.

### Follow Up - Question 10 (part 2)

- 5 Hydro Ottawa stated in its interrogatory response that due to changes in the Facilities
- Renewal Program, one of the three existing facilities that was supposed to be removed is being kept.
  - a) Please confirm which of the three facilities from the settlement agreement is being kept.
  - b) Please provide an explanation for the scope change in the Facilities Renewal Program.
  - c) Please provide the calculation for the revenue requirement impact of the facility that is being kept.

### Response:

21

22

23

24

25

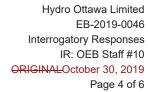

- a) Hydro Ottawa has not recorded revenue requirement impact from removal of the existing facilities in the Y Factor Account. As stated on page 15 of the Approved Settlement Agreement, "The Parties further agree that the value of the old facilities replaced by new facilities will be removed from rate base within the same calendar year of the new Administrative building going into service, or upon the sale of the old facilities, if that is earlier. This is to allow time for Hydro Ottawa to move into its new facilities while minimizing the overlap of assets in rate base."
- At the time of filing the 2020 Rate Application, the existing facilities had not been sold.
- However, subsequent to the submittal of the 2020 Rate Application, one of the existing facilities has been sold and the revenue requirement for that facility will be

Hydro Ottawa Limited EB-2019-0046 Interrogatory Responses IR: OEB Staff #10 ORIGINALOctober 30, 2019

Page 3 of 6

1	recorded into the Y Factor Account commencing in October 2019. Another of the
2	existing facilities, as well as a parcel of land, is scheduled to be sold in the third
3	quarter of 2019. Due to changes in the Facilities Renewal Program, the remaining
4	facility is being kept.
5	
6	b) Please see response to part a)
7	
8	c) Please see response to part a)
9	, , , , , , , , , , , , , , , , , , , ,
10	d) Please see response to part a)
11	υ, · · · · · · · · · · · · · · · · · · ·
12	e) At the time of filing the 2020 Rate Application, none of the existing facilities had
13	been sold. As a result, Hydro Ottawa did not propose a rate rider for the net
14	gain/loss of the existing facilities and revenue requirement impact from the remova
15	of the existing facilities from rate base.
16	of the existing radiities from rate pass.
17	
	Follow Up Response (part 1):
18	Hydro Ottawa proposes to include the revenue requirement of the two facilities that
19	were sold in 2019 into the Y Factor Account balance to be disposed as part of the 2020
20	Rate Application. Both the 2019 and 2020 revenue requirement are being proposed to
21	be cleared.
00	
22	Please see Table 1 for the updated revenue requirement requested to be cleared as
23	part of the Y Factor Account. Please note that the 2019 revenue requirement impact is
24	calculated with the assets being removed during the year. The 2019 presentation
25	therefore shows a zero balance for net assets at the end of 2019, while the 2020

- calculation captures assets remaining in service for the entire year so that a full year
- <sup>2</sup> revenue requirement impact is calculated.

Hydro Ottawa Limited EB-2019-0046 Interrogatory Responses IR: OEB Staff #10 ORIGINALOctober 30, 2019 Page 5 of 6

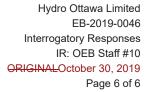

### Follow Up Response (part 2):

a) Hydro Ottawa's Bank Street location is the facility that was identified in the Approved Settlement Agreement which is being retained.

b) It was determined in the detailed design stage of the Facilities Renewal Program (FRP) that the best option was to retain the Bank Street facility in its existing capacity (i.e. as the fleet center and training center), rather than incorporate its components into the design of the new facilities. Detailed evidence to support the FRP will be provided in Hydro Ottawa's 2021 to 2025 Rate Application.

c) Please see Table 2 for the calculation of the revenue requirement for the Bank Street location for 2019 and 2020. Please note that the 2019 revenue requirement impacted is calculated with the assets being removed at year end. The 2019 presentation therefore shows a zero balance for net assets at the end of 2019, while the 2020 calculation captures assets remaining in service for the entire year so that a full year revenue requirement impact is calculated.

And to confirm, Hydro Ottawa is not proposing to return the revenue requirement of the Bank Street facility, as the asset is still in use.

### Question #11:

3

### Ref: Exhibit 9/Tab 1/Schedule 1/Page 4 - Table 3

5 6 7

8

a) In Attachment 3 of the approved settlement proposal from Hydro Ottawa's 2016 Custom IR rate application, it stated that it was anticipated the South and East Operations facilities would be ready in Q2 2017 and the Administrative building would be ready in Q1 2018. Please indicate the actual in-service dates for each of these facilities.

9 10 11

12

13

b) The Y factor amount is capped at \$66M. The asset addition in the Y Factor Variance Account is for \$66M. Please indicate what the total actual capital addition for the new facilities was, with a breakdown between land and each of the facilities (i.e. South/East/Administrative).

14 15

c) Please provide a detailed calculation showing how depreciation and CCA is calculated in Table 3.

17 18

19

16

d) In Table 3, the closing 2019 accumulated depreciation is \$1.145M while the opening 2020 accumulated depreciation is \$1.196. Please explain why the closing and opening accumulated depreciation do not agree.

20 21 e) Please confirm that PILS Grossed-Up is \$259M and not \$159M.

22

### Follow Up - Question 11

23

a) Regarding question 11, part c, please provide the depreciation calculation.

242526

not factor in Bill C-97 for accelerated CCA. Please provide the revenue requirement calculation including the impact from accelerated CCA. Please also provide the accelerated CCA calculation.

b) The revenue requirement of the new facilities recorded in the Y Factor Account does

27

28

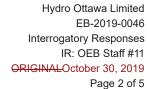

29

### Response:

30 31

32

a) The actual in-service dates for the South and East Operations and Administrative facilities was May 1, 2019.

2	b) At this time, all invoices for the facilities have not been processed. Hydro Ottawa
3	will provide final costs of the new buildings as part of its 2021 Rate Application.
4	Hydro Ottawa confirms that it has spent more than the Y factor cap of \$66M.
5	
6	c) The detailed calculations for CCA in Table 3 can be found in Attachment
7	Att-OEB-Q11-1 for 2019 CCA and Attachment Att-OEB-Q11-2 for 2020 CCA.
8	
9	d) The opening accumulated depreciation of \$1.196M in 2020 was a typo and should
10	have been the same as the closing balance of \$1.145M in 2019. This typo did not
11	impact the calculations presented in Table 3.
12	
13	e) Hydro Ottawa confirms the PILS Grossed-Up for 2020 is \$259K.
14	
15	(Please note that, while the OEB Staff Interrogatory used millions rather than thousands
16	as the unit of value, Hydro Ottawa confirms that the unit should be thousands).
17	Falley, Un Degrapes
	Follow Up Response:
18	a) As outlined in Hydro Ottawa's 2016-2020 Rate Application, Hydro Ottawa uses
19	the half-year rule for calculating depreciation/amortization in the year that capita
20	additions are added to the rate base for both actual and budgeted pooled assets
21	except in the case of discrete material assets, such as a station and facilities. In
22	these specific cases, the actual or forecasted in-service month would be used to
23	calculate the depreciation/amortization.
24	Depreciation was calculated consistent with the above methodology, which was
25	used in Attachment 3, Y Factor Deferral Account (Updated JTC 2.44), of the
26	Approved Settlement Agreement. To calculate depreciation on the \$66 million

rate base additions, the percentage split of components was based on the preliminary allocation of New Facilities costs amongst the various components.

Please see Table 1 for a summary of the depreciation expense, per the described methodology to calculate depreciation.

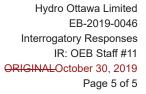

**Table 1 – New Facilities Depreciation** 

USoA	Component	Allocation of \$66M (A)	Useful life in days (B)	Estimate 2019 dep on \$66M (A/B)*244 '000	Estimate 2020 dep on \$66M (A/B)*365 '000

1	b)	The detailed calculations for Accelerated CCA can be found in
2		Att-OEB-Q11-1(Follow-up) for 2019 Accelerated CCA and
3		Att-OEB-Q11-2(Follow-up) for 2020 Accelerated CCA.
4		
5		Bill C-97 includes the new Accelerated Investment Incentive rules (e.g.
6		accelerated CCA), which allow enhanced first year tax depreciation on qualiying
7		new assets available for use and acquired after November 20, 2018. The new
8		building additions added to UCC class 17 were 100% acquired and available for
9		use after November 20, 2018, therefore 100% of these additions qualify under
10		the new accelerated CCA rules. The new building additions added to UCC
11		classes 1b, 8 and 50 were 28% acquired and available for use after November
12		20, 2018, therefore 28% of these additions qualify under the new accelerated
13		CCA rules.
14		
15		Table 2 provides the updated revenue requirement of the new facilities using the
16		accelerated CCA rules.

1

### Question #19:

3

Ref: Exhibit 9/Tab 2/Schedule 1/Attachment 9-2-A – GA Analysis Workform

5 6

The GA Analysis Workform has been updated in the 2020 Filing Requirements:

7

9

10

11

12

- a) The updated Workform includes columns indicating whether each reconciling item is a principal adjustment. Please provide this table for Account 1589.
- b) Please confirm the accuracy of the RRR balances in Note 2.
- c) Please also confirm that the GA rate used for unbilled GA revenues is the same as the one used for billed revenues in any particular month.

13 14

### Follow Up – Questions 19 and 20

- 15 a) The response to question 19 indicates that the GA Analysis Workform was revised due to question 20. Question 20 indicates that the GA Analysis Workform and the DVA Continuity Schedule were not revised as a result of question 20. Please clarify the source of the revisions.
  - b) The GA Analysis Workform submitted as part of the initial application included reconciling item 6 of (\$509,520) for the difference in GA posted rate and rate charged on the IESO invoice. This reconciling item has been removed in the updated Q19-1 GA Analysis Workform. Please explain why.

23

19

20

21

Hydro Ottawa Limited EB-2019-0046 Interrogatory Responses IR: OEB Staff #19 ORIGINAL October 30, 2019

Page 2 of 4

1

### Response:

2

3

a) Hydro Ottawa has provided an updated GA Analysis Workform,

4

reconciling item is a principal adjustment. The updated model includes changes that are discussed in responses to OEB Staff Interrogatory 20.

5

6

7

8

1011

12 13

14

15

16 17

18

c) In Note 2, the difference between the "Total Metered excluding WMP" value of 7,363,836,567 kWh and Hydro Ottawa's 2018 RRR 2.1.5.4 submission is related to Sentinel Lights. In RRR 2.1.5.4, Total Metered Consumption in kWh is 7,396,491,891 less metered kWh for Wholesale Market Participants of 32,606,891, less Sentinel Lighting kWh of 48,433. This results in 7,363,836,567 – the same figure as Note 2, on the GA Analysis tab of the GA Analysis Workform. See Table 1 below for this comparison. Hydro Ottawa has updated the GA Analysis Workform Att-OEB-19-1-GA Workform to include Sentinel Lighting under RPP of Note 2. The "Total Metered excluding WMP" in the GA Workform is now 7,393,885,000 kWh, as per "Total Metered excluding WMP" in Table 1 below.

b) Attachment Att-OEB-Q19-1, which includes the columns indicating whether each

Table 1 – Comparison of Metered kWh (GA Workform vs. RRR 2.1.5.4)

GA Analysis Worform - GA Analysis Tab - Note 2	kWhs
Total Metered excluding WMP	7,363,836,567
Hydro Ottawa's RRR - 2.1.5.4 - 2018	
Total Metered Consumption	7,396,491,891
Less: Wholesale Market Participant	32,606,891
Total Metered excluding WMP	7,393,885,000
Less: Sentinel Lighting	48,433

1

3

d) Hydro Ottawa confirms that the GA rate used for unbilled GA revenues is the same as the one used for billed revenues in any particular month.

4 5

6

7

8

9

### Follow Up Response:

a) OEB Staff Interrogatory 20 asked about reconciling items 1a and 2a of the GA Analysis Workform and requested the GA Analysis Workform to be updated. No changes were required to the GA Analysis Workform related to these items, hence the response stated, "no changes are required to the GA Workform or to the DVA Continuity Schedule related to this OEB Staff Interrogatory."

11

12

13

14

15

16

17

18

19

20

21

10

However, while reviewing the GA Analysis Workform, it was noticed that an error with the numerical sign was made in section 2b. The numerical sign issue referenced in OEB Staff Interrogatory 20 noted the 2017 RPP settlement true-up error occurred but did not mention that the 2018 RPP settlement true-up had the same issue. The 2018 RPP settlement true-up was one of the adjustments that Hydro Ottawa made in the revised 2b in Att-OEB-Q19-1 - GA Workform and attached it as part of the response to OEB Staff Interrogatory 20. In addition, the corresponding change was made to the DVA Workform; Att-OEB-Q20-DVA Workform in cell BF32, RSVA - Global Adjustment on tab 2a.2017 Continuity Schedule.

Hydro Ottawa Limited EB-2019-0046 Interrogatory Responses IR: OEB Staff #19 ORIGINAL October 30, 2019 Page 4 of 4

In addition, the GA Analysis Workform was updated for sentinel lights kWh, as per

OEB Staff Interrogatory 19. Please see part b) to this Interrogatory Follow Up

Response for the third adjustment.

4 5

6

7

8

9

b) While reviewing the GA Analysis Workform in relation to OEB Staff Interrogatories, an error was noticed in reconciling item 6. Reconciling item 6 was incorrectly included in the Workform. The (\$509,520) was included in the net change in Account 1589 Principal Balance in the year requested for disposition and is not a separate reconciling item. As a result, the figure was correctly removed in the update Att-OEB-Q19-1 - GA Workform.

Question #21:

For Account 1595 (2014), there is a difference in the balance approved for disposition between the Workform and that in the 2014 decision and rate order (EB-2013-0143). The differences are below. Using the approved balances from the 2014 decision and rate order, the

collections/returns variance for Global Adjustment would be 9.5%.

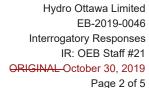

Ref: Exhibit 9/Tab 2/Schedule 1/Attachment 9-2-C – 1595 Workform

	1595 Workform	2014 Decision	Difference
Group 1 (excluding GA)	(13,600,284)	(13,791,456)	(191,172)
Global Adjustment	(4,915,205)	(5,381,404)	(466,199)
Total Group 1	(18,515,489)	(19,172,860)	(657,371)

- a) Please reconcile the difference between the approved disposition amounts and revise the Workform as needed.
- b) Please state the approved amounts that was transferred into Account 1595 (2014). If they do not agree to the 2014 decision and rate order, please revise the balance in Account 1595 (2014) as appropriate.

### Follow Up – Question 21

- a) Please provide the specific references from the 2017 and 2016 rate proceedings that approved the disposition of Account 1595 (2014).
  - b) The Chapter 3 Filing Requirements for Electricity Rate Distributions state that applicants are expected to request disposition of residual balances in Account 1595 Sub-accounts for

each vintage year only once, on a final basis. Please explain why Hydro Ottawa is proposing disposition of Account 1595 (2014) again in the current application.

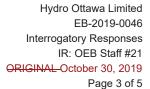

### Response:

a) Hydro Ottawa has reviewed the amounts entered into the 1595 (2014) Workform and acknowledges the difference of \$(657,371) compared to the 2014 Decision and Order. This difference is a result of 1595 (2014) being disposed of multiple times. The amounts entered into the 1595 (2014) Workform are the totals of the dispositions into 1595 (2014) and the two dispositions of 1595 (2014). As the 1595 Workform does not have a place to enter dispositions of 1595, Hydro Ottawa added them together. Please see Tables 1 - 3 below for a reconciliation of the difference between Hydro Ottawa's 1595 Workform and the 2014 Decision and Order. In the tables, the row for the year 2014 matches with the 2014 Decision and Order, and the sum of the rows for 2014, 2016 and 2017 equals that which was included in the 1595 (2014) Workform. Hydro Ottawa proposes to leave the 1595 (2014) Workform as originally submitted.

Table 1 – Principal Summary for 1595 (2014)<sup>1</sup>

Rate Year Disposal	GA	Other	Total
2014	\$(5,253,421)	\$(13,493,298)	\$(18,746,719)
2016	511,255	120,507	631,762
2017	(89,367)	(21,753)	(111,120)
Total	(4,831,533)	\$(13,394,544)	(18,226,077)
GA Workform	(4,831,532)	\$(13,394,544)	(18,226,076)

### Follow Up Response:

a) Below please find the specific references from the 2016 and 2017 rate proceedings that approved the disposition of Account 1595 (2014).

The specific reference that approved the 1595 (2014) balance in the 2016 rate proceeding (EB-2015-0004) can be found in the Approved Settlement Agreement in Section G: Settlement Proposal by Issue. Specifically, it is located in issues list item 5.3, which can be found on page 46 of the Approved Settlement Agreement. The 1595 (2014) balance can be found in the DVA Continuity Schedule<sup>4</sup> provided as part of the Approved Settlement Agreement. Please note, in the 2016 rate proceeding, 1595 (2014) was in the row for 1595 (2013) which was subsequently corrected in the DVA Continuity Schedule<sup>5</sup> provided with the 2018 proceeding, EB-2017-0052.

The specific reference that approved the 1595 (2014) for 2017 can be found in Table 2 - DVA Balances of the Decision and Order for the 2017 rate application (EB-2016-0084)<sup>6</sup>, as well as in the DVA Continuity Schedule. Please note that, at the time of that application, 1595 (2014) was in the row for 1595 (2013), which was subsequently corrected in the DVA Continuity Schedule<sup>7</sup> for the 2018 rate proceeding (EB-2017-0052).

Since the updated filing requirement, Hydro Ottawa has proposed to wait until after most cancel/rebill activity ceases to request final disposition of Account 1595, including 1595 (2014). As part of Board Staff Interrogatory #7 related to Hydro Ottawa's 2019 Rate Application (EB-2018-0044), Board Staff requested Hydro Ottawa to revise its application to include a request for disposition of Account 1595 (2014). This request from Board Staff came in response to Hydro Ottawa's proposal to defer disposition of Accounts 1595 (2014) and 1595 (2016) to a later date. However, in the Decision and Rate Order for the 2019 rate proceeding, the OEB approved Hydro Ottawa's proposal for deferred disposition. The OEB had acknowledged that these accounts met the eligibility for disposition (i.e. one year had passed since the end of the rate riders

Application updates to Chapter 3. This was subsequent to Hydro Ottawa's initial

requests to clear 1595 (2014). Hydro Ottawa has followed the updated filing

Nevertheless, as stated in the Decision and Rate Order, "given the immaterial amounts of the accounts in question, the OEB approves Hydro Ottawa's proposal to defer

disposition of Accounts 1595 (2014) and 1595 (2016)." Hydro Ottawa therefore has

associated with these accounts and the residual balances had been audited).

understood that Board staff supported Hydro Ottawa's position that the updated filing

requirement was intended to be applied on a go-forward basis.
