

RATES FOR Small Business Customers

with Demand Less than 50 kW

| EFFECTIVE MAY 1, 2019

RATES

The Ontario Energy Board (OEB) sets small business rates for electricity under the Regulated Price Plan (RPP).

The OEB reviews and adjusts these rates, if required, twice a year: in the summer (May 1) and in the winter (November 1).

The majority of Hydro Ottawa customers pay Time-of-Use rates (TOU). Tiered price customers (consumption calculated based on two price tiers), may visit oeb.ca for more information.

ELECTRICITY CHARGE

Off-Peak (lowest price)	\$0.065/kWh
Mid-Peak (medium price)	\$0.094/kWh
On-Peak (highest price)	\$0.134/kWh

TOU (SUMMER)

DELIVERY

Transmission	\$0.0119/kWh
Hydro Ottawa Variable and Other Charges - RPP	\$0.0231/kWh ¹
Hydro Ottawa Variable and Other Charges - Non-RPP	\$0.0239/kWh ¹
Hydro Ottawa Fixed Charge	\$19.07/month
Smart Meter Entity Charge	\$0.57/month
Low Voltage Services Charge	\$0.00006/kWh
Delivery Line Loss Charge	See below for calculation ²

REGULATORY

\$0.0039/kWh³

8% PROVINCIAL REBATE

See below⁴

¹ Customers are charged either the 'Hydro Ottawa Variable and Other Charges - RPP' rate or the 'Hydro Ottawa Variable and Other Charges - Non-RPP' rate. The difference in the two rates relates to how the Global Adjustment is billed to customers. Customers who purchase their electricity from an electricity retailer are not on the RPP.

³ For Standard Supply Service customers (customers who do not purchase their electricity from an electricity retailer), a monthly administration fee of \$0.25 is added to the Regulatory Charge to recover a portion of the cost of systems required for the market.

² The Delivery Line Loss Charge is calculated by multiplying the Electricity Charge Consumption (per RPP category) by the loss factor and then multiplying this number by the current RPP rate category. More details on this calculation follow in this brochure.

⁴ The rebate is equal to the provincial portion of the Harmonized Sales Tax (HST) on base electricity bills, representing an 8% savings.

Understanding Your Bill

Hydro Ottawa provides you with electricity service to your business. Your bill includes the costs for electricity consumption, the transmission and delivery of the electricity, taxes, and some other electricity market costs.

While your total bill is paid to Hydro Ottawa, only the distribution charges are kept by Hydro Ottawa. The distribution charges are included in the delivery line of your bill. Hydro Ottawa collects the remaining charges on behalf of other organizations, without any mark-up to your business.

ELECTRICITY CHARGE

Your bill includes a charge for Electricity. This is the cost of the electricity that you used during the billing period.

Small business customers with a demand of less than 50 kW have the option of buying their electricity through the **Regulated Price Plan (RPP)** at a regulated price per kilowatt hour (kWh). You are automatically part of the RPP unless you choose to purchase your electricity from an electricity retailer. If you buy your electricity under contract with an electricity retailer, the price you pay for the electricity that you use is set out in the electricity contract. While the price is not regulated by the OEB, they license these companies and play a consumer protection role to ensure associated rules and codes are followed.

The RPP rate also includes the Global Adjustment (GA). Most electricity generating companies receive a guaranteed price for the electricity they produce. The GA accounts for differences between the spot market price and the rates paid to regulated and contracted generators as well as conservation and demand management programs. Under Ontario's Fair Hydro Plan, for eligible customers, a portion of the GA has been refinanced with the costs of clean energy investments spread out over a longer period of time.

All electricity customers pay a share of the GA. As indicated above the GA is factored into RPP rates. If you sign up for a contract with an electricity retailer,

you will see a separate line on your bill for the GA as the retailer's contract price does not include this charge. The reduction associated with GA refinancing is applied to non-RPP customers in the form of a credit that came into effect on July 1, 2017. The GA credit appears as an additional line item on your bill.

RPP prices are reviewed and adjusted, if required, twice a year, once in the summer (May 1) and once in the winter (November 1). The OEB sets the RPP prices based on its forecast of the cost to supply households and small businesses over the 12 months that follow. In addition to providing stable and predictable electricity pricing, these prices are designed to recover the payments made to the electricity generators that produce power.

Time-of-Use prices (TOU) reflect the cost of electricity at different times of the day. There are three TOU periods: On-Peak (highest price), Mid-Peak (mid-price) and Off-Peak (lowest price). These periods vary depending on whether it's summer or winter. Prices are lowest between 7:00 p.m. and 7:00 a.m. on weekdays, and all day on weekends and holidays.

This pricing encourages customers to use electricity during lower-cost time periods. In turn, this can ease the pressure on the provincial power system during high or peak demand periods. By reducing the electricity required during peak demand periods, it can also benefit the environment.

DELIVERY CHARGE

The delivery charge covers the costs of delivering electricity from generating stations across the province to your business through high voltage (transmission) and low voltage (distribution) power lines. It includes the costs to build and maintain transmission and distribution lines, towers and poles and to operate provincial and local electricity systems.

Some of the delivery charges are “fixed,” meaning the same amount is on your monthly bill no matter how much electricity you use in each month. Other charges vary depending on how much electricity you use.

It is normal for a small amount of power to be lost as it travels over power lines. In calculating your electricity costs for the billing period, Hydro Ottawa multiplies your metered electricity consumption use by an **adjustment factor** that accounts for those losses. The adjustment factor is calculated by comparing the total amount of electricity we buy on behalf of our customers to the amount of electricity we deliver to their homes. This adjustment factor is approved by the OEB. The charges for electricity losses are included on the Delivery line of your bill.

The majority of small business customers can expect a delivery line loss of approximately 3.35%. Hydro Ottawa collects and pays this amount directly to our suppliers.

The adjustment factors for small business customers are:

- 2.32% for customers with primary meters, or
- 3.35% for customers with secondary meters.

The Smart Meter Entity charge recovers the costs of the development and implementation of Ontario’s central database that stores, processes and manages hourly electricity consumption data for smart meters. Hydro Ottawa collects and passes it through, without mark-up, to the Independent Electricity System Operator.

REGULATORY CHARGES

Regulatory charges are the costs of administering the wholesale electricity system and maintaining the reliability of the provincial grid. The Regulatory Charge also includes a portion of the Rural and Remote Electricity Rate Protection.

HARMONIZED SALES TAX (HST)

The Harmonized Sales Tax (HST) applies to all electricity bills.

THE ONTARIO FAIR HYDRO PLAN (OFHP)

Including the 8% Provincial Rebate

Ontario's Fair Hydro Plan (OFHP) was introduced to lower electricity bills by an average of 25 per cent for typical residential customers across the province. Many small businesses and farms also benefit from this new initiative. This reduction includes the **eight per cent** provincial rebate.

Businesses with a demand of less than 50 kilowatts or annual consumption of less than 250,000 kWh automatically qualify. Large business, institutional and industrial customers may qualify for the 8% provincial rebate that is equal to the provincial portion of the HST. Customers can visit hydroottawa.com/ofhp for eligibility requirements.

OTHER POSSIBLE CHARGES

Some of the other charges that may appear on your monthly bill from Hydro Ottawa are explained below.

- New accounts are subject to an **Account Set-up Charge** of \$30.00. This charge also applies when a customer moves from one address to another or when a new customer takes over an account.
- A **Security Deposit** may be applied to an account as a condition of service.
- A **Credit Check Charge** of \$15.00 may be required for new customers who have never had hydro bills in their name or who have moved from outside Hydro Ottawa's service territory.
- An administrative charge of \$15.00 applies when a customer requests a **duplicate invoice** of a paper bill that they already received.
- An **Account Certificate Charge** of \$15.00 covers the cost of investigating whether an outstanding balance exists.
- To avoid interest charges, Hydro Ottawa must receive your payment on or before the **Due Date** on your bill. It is important to allow sufficient time for your payment to be received and processed, by taking into account the time required for payment to be transferred from your financial institution or to be delivered by mail.
- An unpaid balance after the due date is subject to an **Interest Charge** of 1.5% per month, compounded monthly (19.56% per year).
- A **Returned Payment Charge** of \$15.00 plus any bank charges is applied when cheques are returned for non-sufficient funds (NSF) on an account.
- A **Special Billing Service Charge** of \$102.00 (billed in 15 minute increments with a minimum charge of one hour) is applied when customers request historical billing information. This does not include duplicate invoices and arrears certificates, which have a specific rate.
- If a customer requests that a meter be investigated and the billing is determined to be correct, a **High Bill Investigation Charge** of \$227.00 is applied. If there is a problem with the meter, the customer is not charged.
- The charges for **customer initiated disconnections**, also referred to as an Isolation or Re-energization, are detailed in Hydro Ottawa's Conditions of Service, Section 2,2,2. and Appendix G, sections G-1.6 and G-3.1.

- **Non-payment of account Reconnection Charges** are based on the type of electrical service and time of day.*

+ At meter during business hours	\$65.00
+ At meter after business hours	\$185.00
+ At pole during business hours	\$185.00
+ At pole after business hours	\$415.00

- Customer Administration **Reconnection Charges of new Account without account holder***

+ At meter during business hours	\$65.00
+ At meter after business hours	\$185.00

- A **Temporary Service Installation/Removal Charge** applies when a customer asks for temporary service to be connected or removed. These charges only apply to 200 @ 120/240V.

+ Temporary Service installation/removal	
- overhead (no transformer)	\$848.00
+ Temporary Service installation/removal	
- underground (no transformer)	\$1,230.00
+ Temporary Service installation/removal	
- overhead (with transformer)	\$3,023.00

*Our electrical service (reconnection/ installation) business hours are Monday to Friday from 8:00 a.m. to 4:00 p.m. (excluding statutory holidays).

- **Charges for microFIT, Net Metering and FIT Generators**

Generator charges are available online at hydroottawa.com/generatorcharges.

All of the above charges are subject to **HST**.
