

# Ontario's System-Wide Electricity Supply Mix

Ontario's electricity supply comes from various sources. Throughout 2018, Ontario's reliance on power sources such as nuclear energy declined, and alternative power sources such as wind increased. Ontario's electricity supply mix is expected to continue to change throughout and beyond 2019 as industry and consumer needs evolve.

For more information on Ontario's supply mix, visit [www.oeb.ca](http://www.oeb.ca).

## ONTARIO'S ELECTRICITY SUPPLY MIX\*

\* Includes Lennox, dual fuel (ng/bio) consistent with IESO.

\*\* IESO's embedded generation data set merges biomass and gas.

\*\*\* Non-Contracted represents a variety of fuel types that the IESO is unable to categorize due to a lack of information from Local Distribution Companies (LDCs).

Note: Figures may not add up to 100% due to rounding.
