THE LITTLE BOOK OF  
**GREAT BIG**  
ENERGY SAVINGS

---

OVER **\$100** IN COUPONS INSIDE

# Saving energy saves you money

The tips in this book can help you find energy saving opportunities around your home, along with **over \$100 in coupons** for energy-efficient products so you can start saving money right now. I can also help you discover even more energy saving tips at [saveonenergy.ca/tips](https://saveonenergy.ca/tips)

For more coupons and a list of participating retailers, visit [saveonenergy.ca/coupons](https://saveonenergy.ca/coupons)

ENERGY STAR® qualified LED bulbs can last **up to 30x longer** than incandescent bulbs.

ENERGY STAR® qualified indoor fixtures use **up to 75%** less electricity.

Unplug electronics when they're not in use, or use a power bar with a timer or auto-shutoff. Phantom power can account for **up to 20%** of household energy use.

## It's easy to manage your energy

Enrol in **peaksaver PLUS** and join over 190,000 Ontarians who are already working together to manage their electricity use. You'll also receive a **FREE in-home Energy Display!**

Plus, you could earn **100 AIR MILES®†** reward miles.\*

Visit [saveonenergy.ca/plus](https://saveonenergy.ca/plus) or contact your local electric utility for program availability in your area.

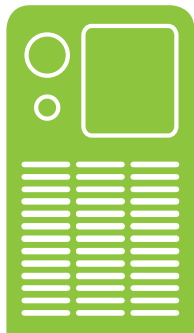

The most energy-efficient way to boil water is by using an electric kettle with auto-shutoff.

ENERGY STAR® qualified CFL bulbs use **up to 75%** less electricity and last **up to 10x longer** than incandescent bulbs.

Save **up to \$125** a year on your electricity costs when you get rid of your old, inefficient fridge and/or freezer. We'll pick it up and recycle it, **FREE** of charge. Book your appointment at [saveonenergy.ca](http://saveonenergy.ca) or call **1-877-797-9473**.

## Trade up and save

The **EXCHANGE EVENT** happens twice a year, offering you an easy way to trade in an old inefficient dehumidifier<sup>†</sup> and receive a **\$50 coupon** towards a new ENERGY STAR<sup>®</sup> qualified unit.

Replacing your old appliance with an ENERGY STAR<sup>®</sup> qualified dehumidifier could save you **up to \$50 per year** on electricity costs since they use **up to 20% less energy** than non-qualified models. The savings from your ENERGY STAR<sup>®</sup> dehumidifier could power your ENERGY STAR<sup>®</sup> refrigerator for 5 months.

For dates, participating retailers and further details, visit [saveonenergy.ca/exchangeevent](https://saveonenergy.ca/exchangeevent)

Dimmer switches, indoor motion sensors and timers can help reduce your energy consumption.

ENERGY STAR® qualified ceiling fans **use 50%** less energy than standard fans and move **up to 25%** more air.

ENERGY STAR® qualified dehumidifiers use **up to 20%** less energy than non-qualified models.

## An incentive that really pays off

With as much as 60% of an average home's energy use going towards heating costs, it makes sense to consider the energy-efficiency of your furnace and central air conditioning units. You can receive up to **\$650<sup>†</sup> in incentives** when you participate in the **HEATING & COOLING INCENTIVE** and **save up to \$325<sup>††</sup>** a year in energy costs.

Plus, you could earn **50 AIR MILES<sup>®†</sup> reward miles.\***

Visit [saveonenergy.ca/hvac](http://saveonenergy.ca/hvac) to find a participating contractor in your area or call **1-855-592-HVAC**.

Subject to additional terms and conditions found at [saveonenergy.ca](http://saveonenergy.ca). <sup>†</sup>Incentives are available for installation of eligible equipment completed between Jan. 1 and Dec. 31 and submitted no later than Feb. 1 of the following calendar year. Equipment must be purchased from and installed by a participating contractor. **\$250 incentive** with the purchase and installation of an eligible furnace. **\$250 OR \$400 incentive** with the purchase and installation of an eligible central air conditioner system. <sup>††</sup>Annual electricity cost savings are estimated based on past program experience. Actual savings may vary. \*Offer subject to terms and conditions found at [saveonenergyrewards.ca/termsconditions](http://saveonenergyrewards.ca/termsconditions). Funded by the Ontario Power Authority and offered by your local electric utility. <sup>™</sup>Official Mark of the Ontario Power Authority. <sup>®††</sup>Trademarks of AIR MILES International Trading B.V. Used under license by LoyaltyOne, Co. and Ontario Power Authority.

Ensure your freezer is set to  $-18^{\circ}\text{C}$ . A freezer that is set  $5\text{--}6^{\circ}\text{C}$  colder can use **up to 25%** more energy.

Vacuuming the exhaust once a year and keeping your lint filter clean will help improve the overall efficiency of your dryer.

Having a licensed HVAC professional service your furnace once each year can improve your unit's efficiency by **up to 20%**.

## Are you already enrolled in *peaksaver PLUS*?

You may have received an in-home Energy Display, which can help you reduce your household energy consumption.

For more information on the ***peaksaver PLUS*** program, how-to videos on using your energy display, FAQs and troubleshooting advice, visit [saveonenergy.ca/energydisplay](https://saveonenergy.ca/energydisplay)

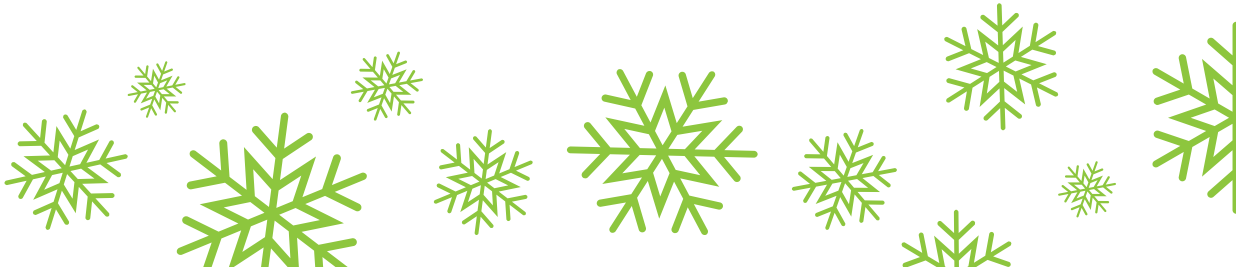

Weatherstripping can reduce your heating and cooling costs.

Use a clothesline or outdoor umbrella stand to dry your clothes instead of using electricity to run the dryer.

Save **up to \$75** a year on above-ground pool or hot tub costs with a heavy-duty outdoor timer.

# Fall/Winter Energy Conservation Checklist

- Caulk or seal drafts around windows, doors and air vents and check insulation.
- Arrange for a maintenance check on your furnace to ensure efficiency.
- Open curtains and blinds during the day to let the sun warm the room.
- Seal your fireplace to reduce your household heating and cooling needs.
- Program your thermostat to 20°C when you're home and 17°C when you're away or sleeping.

## A small business program that could save you big time

Small businesses can get **up to \$1,500** for energy-efficient lighting upgrades through the **SMALL BUSINESS LIGHTING** program. High efficiency upgrades can go a long way toward reducing your electricity consumption and managing operating costs.

Discover more ways your business can save at [saveonenergy.ca/business](https://saveonenergy.ca/business) or by contacting your local electric utility.

## Small things make a big impact

These checklists are handy reminders of the little things you can do around your home to save energy all year long.

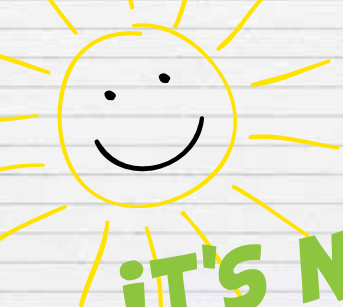

**Discover additional energy saving tips at [saveonenergy.ca/tips](https://saveonenergy.ca/tips) and take a more extensive tour online to find out how much you could be saving.**

# Spring/Summer Energy Conservation Checklist

- Use a ceiling or portable fan when you're in a room and turn it off when you leave. Remember: fans are meant to cool off people, not rooms.
- Draw curtains or blinds to shade windows and keep out the heat from direct sunlight.
- If you go on vacation for a week, turn off your air conditioner.
- Install motion sensor lights or programmable timers on outdoor lights.
- Hang laundry on the clothesline instead of using the dryer.

# IT'S NEVER TOO EARLY TO START LEARNING ABOUT ENERGY EFFICIENCY

Sharing these tips with your kids is a great way to start teaching them about saving energy around the house. You can even have some fun assigning jobs and saving energy together!

## Lights out!

Whenever you leave a room, don't forget to turn off the light (otherwise, you're wasting energy).

## Dial it down before bed.

Designate someone to turn down the heat before bed to 17°C.

## Make phantom power disappear.

Even when an appliance is off (and plugged in), it's still using energy. Plug electronics like TVs, computers, game consoles, and chargers into a power bar with a timer or auto-shutoff.

## Be cool.

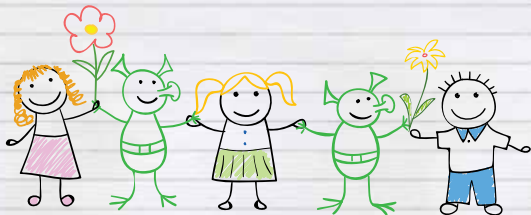

Instead of turning up the air conditioning on a warm day, use a fan to cool off. It uses less electricity.

## Don't eat up extra electricity.

Before you open the fridge door and go looking for something to eat, decide what you want first. Leaving the door open too long is a waste of energy.

## Go oven-free.

Reheat food in a toaster oven instead of the oven. It saves more electricity.
