Finding a solar PV or battery storage contractor

Thinking about installing solar panels or home battery storage? Whether you're exploring available incentives or simply planning an energy project, finding a qualified contractor is an important first step.

Use the resources below to help find solar PV installers and battery storage providers.

Where to find a contractor

Canadian Renewable Energy Association (CanREA)

CanREA maintains an industry directory featuring installers, developers, service providers and other companies working in Canada's renewable energy sector, including solar energy.

Browse the CanREA member directory to explore potential contractors and service providers.

Pursuing an incentive? Here's what you need to know.

Home Renovation Savings Program (HRSP)

HRSP does not maintain a list of qualified contractors or endorse specific contractors for its solar stream. Customers can use the CanREA directory as a resource when researching potential solar PV installers.

Learn more about the Home Renovation Savings Program.

GridFlex

Currently, Tesla Powerwall is the only eligible home battery storage system under GridFlex. Customers pursuing the GridFlex new home battery storage incentive must purchase and install a new eligible Tesla Powerwall system through an authorized seller.

- **Find a certified installer:** Use Tesla's Certified Installer directory to find a Tesla-certified installer.
- **Other battery brands:** Other manufacturers are not currently eligible for GridFlex. Eligibility is expected to expand in 2027.

Hydro Ottawa

A few things to keep in mind

- Research multiple contractors and compare quotes, equipment options and installation services.
- Confirm that your chosen contractor is qualified to install the specific equipment you're considering.
- If you're pursuing an incentive, review the program's eligibility requirements before purchasing equipment or beginning installation. Some programs require approval before work starts.

Important: Being listed in an industry directory or being a certified installer does not automatically guarantee eligibility for an incentive. Always review the applicable program requirements before proceeding.
